DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 through 18 and 44 through 68, drawn to a communication between elements within a static presentation system, classified in class 358, subclass 1.15.
 - II. Claims 19 through 43 and 69, drawn to a method of managing and processing object-oriented database structure and its maintenance in memory, classified in class 707, subclass 103X.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions GI and GII are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because GI is drawn to a communication between elements within a static presentation system. The subcombination has separate utility such as GII is drawn to a method of managing and processing object-oriented database structure and its maintenance in memory.

Art Unit: 2622

3. Because these inventions are distinct for the reasons given above and have acquired a separate in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
